- Project Management
- Responsiveness
- Workplace Habits
- Career Planning
Bell Ringer Activity

Who, How, When

On a piece of paper, write an example of a well-known character (fictional or real) who disappointed someone else because of their actions. Be sure to include who the character is, how his or her behavior did not meet the expectation and where the team/group ended up as a result. You’ll have three minutes to do this.
What is Reliability?

**Definition:** The quality of being trustworthy or of performing well consistently.
Discussion

• What if I was rated each day on my reliability and my rating was available for others to see?
• What would my rating be on a scale of one to ten?
• How would my rating affect how others would work with me?
Essential Question

What can I do so others know they can count on me?
Reliability and the SkillsUSA Framework

SkillsUSA has an impact on the lives of America's future workforce through the development of personal, workplace and technical skills that are grounded in academics.

- Which word did all three groups share?
- Which of your group’s words is a SkillsUSA Essential Element?
- How does this Essential Element relate to reliability?
Experience Overview
